

Golf Bag Manufacturer Pre-Purchase Checklist

Based on LantaoBags factory audits — verify these before committing to any supplier.

1. Chengsheng Golf

- ☐ Exact fabric denier ratings confirmed in writing
- ☐ YKK zipper model numbers specified
- ☐ Stand mechanism cycle-test data reviewed

2. TH Sport

- ☐ Current factory locations confirmed (they've relocated lines before)
- ☐ Communication turnaround tested on a sample RFQ
- ☐ Exact zipper placement specs locked in tech pack

3. Szoneier

- ☐ Second prototype from production line (not sampling room) received
- ☐ Maximum monthly throughput confirmed in writing
- ☐ Leather grade and lining strength specified in tech pack

4. Legend Times

- ☐ Corporate filings audited via China's NECIPS
- ☐ Raw tensile test data on straps obtained
- ☐ ISO 13934 test reports for load-bearing components reviewed

5. Sandesheng Sports

- ☐ Verified Chinese business license obtained
- ☐ Recent QC logs from past golf bag orders reviewed
- ☐ Raw textile test certificates in hand

6. Tourbon Sports

- ☐ Divider stiffness tested with loaded clubs
- ☐ Empty bag weight verified against target spec
- ☐ Waterproofing treatment spec sheet received (if wet-climate markets)

7. Gostar Sports

- ☐ Exact dimensions locked in tech pack
- ☐ Total empty weight confirmed
- ☐ Final pocket layout approved

Pre-Contract Essentials (All Manufacturers)

- ☐ Mold ownership terms confirmed in writing
- ☐ Mutual NDA signed and IP ownership of all design files confirmed
- ☐ Current REACH compliance test reports (EU-bound shipments)
- ☐ Container-efficiency math calculated — poor box loading wastes thousands in freight

7-Stage QC Protocol

- ☐ Tech-pack approval — materials, hardware specs, tolerance ranges locked
- ☐ Incoming IQC — raw fabrics inspected for weight, colorfastness, flaw count
- ☐ Cut-panel accuracy — $\pm 0.5\text{mm}$ tolerance verified on all panels
- ☐ In-line sewing audit — 20 units per production day random-checked
- ☐ Load tests — structural capacity + 15% safety margin; stand-leg deployment cycles
- ☐ Environmental durability — Salt Spray Test (ASTM B117) for hardware; UV chamber for fabrics

□ Final AQL 2.5 review — pack-out inspection before container loading
